Summary:

Frontend web developer looking to make an impact collaborating with talented developers. A self-motivated learner adept at solving complex problems and thinking creatively in an analytical environment.

Technical Skills:

HTML, CSS, Javascript, jQuery, AJAX, GitHub, Visual Studio Code, npm, Chrome DevTools

Projects:

Connected Politics https://anusontarangkul.github.io/connected-politics/
- Created a website application with HTML, CSS, JavaScript, jQuery, and a minimalist design to promote political involvement.
- Used the jQuery Ajax function via APIs from Google and ProPublica to dynamically display elected officials and upcoming bills relevant to the address the user entered.
- Integrated Twitter Developer tools to allow users to tweet about an upcoming bill, auto-populating the tweet with the URL of the bill.

Weather Dashboard https://anusontarangkul.github.io/weather-dashboard/
- Created a website application with HTML, CSS, JavaScript, and jQuery to help users look up the weather by entering a city.
- Used the jQuery Ajax function from the OpenWeatherMap API to find location-based weather data and dynamically append the information to the HTML and CSS on the page using Javascript.
- Customized and enhanced the user experience by saving their searched city to the local storage for convenient accesses.

Work Experience:

Promoter, Wynn Las Vegas (*June 2018 - March 2020*)
- Planned and implemented digital marketing strategies that included informational videos and reviews.

Ecommerce Graphic T-shirt, Business Owner (*July 2016 - June 2018*)
- Designed a Shopify website and optimized sales on Amazon through Search Engine Optimization (SEO).

Securities Compliance Accountant II, DAC Bond (*June 2015 - July 2016*)
- Analyzed municipal bond financial statements for SEC compliance.

Education:

University of California, Berkeley MERN Full Stack Coding Bootcamp (*2020*)
University of Florida Master in International Business (*2015*)
University of Florida Bachelor of Science in Finance (*2014*)
